

The OUTDOOR MAGAZINE *of* TEXAS

Digital Submission Guidelines:

Digital images may be submitted in either TIFF (uncompressed) or RAW format. Include small JPEG's for viewing, and separate all images into folders by article. Digital images should be supplied to us on CD or DVD and must be Macintosh OS X compatible. They should be accompanied by a printout of the thumbnails with file caption. Please include as much metadata information as you can with each file. This should include your contact information, and captions. You may also provide a link to your submission that can be viewed online. Please make sure the link is live for up to two months, and that images again include captions, or are organized by article. On a case-by-case basis, lower resolution images such as JPEGs can be sent by email for small-scale reproduction. The magazine will not return CD and DVD submissions.
